EDUCATION

SRM Institute of Science and Technology, Kattankulathur	Expected 2027
B.Tech, Computer Science and Engineering	CGPA 8.74 / 10
Minor, Data Science	Feb 2026 – Present
Loyola School, Jamshedpur	
ISC, Class XII	91% · 2023
ICSE, Class X	91% · 2020

EXPERIENCE

AWS Cloud Club — Digital Design Lead	Chennai, India · Apr 2026 – Present
<i>Part-Time</i>	
D Hub Technologies — Software Intern	Feb 2026 – Apr 2026
• Led end-to-end delivery of two features, Deals and Community, from planning through deployment • Designed custom icon sets adopted company-wide, improving UI consistency • Built and optimized application screens across web and mobile for performance and UX • Tested web and mobile builds pre-release, identifying and resolving bugs	
Alexa Developers SRM — Business Member	Chennai, India · Jul 2025 – Jul 2026
<i>Part-Time</i>	
RSB Global — Intern	Jamshedpur, India · Jul 2025 – Aug 2025
• Built a network-based System Monitor tracking system health, availability, and performance • Designed a Visitor Management System covering registration, badging, and real-time entry tracking • Developed an interactive Production Metrics Dashboard for live insight and faster decisions	
TATA Steel — Data Analyst Intern	Jamshedpur, India · May 2025 – Jul 2025
• Analyzed and modeled internal datasets in Excel across multiple projects • Built Tableau visualizations to communicate findings to stakeholders • Collaborated with industry experts to validate analysis and approach	

PROJECTS

APMS 3.0 — Decentralized Smart Parking Management System

Jan 2026 – Apr 2026

Flask · Computer Vision · Machine Learning · Blockchain · IoT · Geolocation

- Combined Edge AI and IoT for low-latency, decentralized parking operations
- Built FASTag (RFID) authentication and OpenCV-based occupancy detection for contactless entry
- Applied Federated Learning for privacy-preserving license-plate recognition, keeping data on-device
- Designed a Multi-Agent Reinforcement Learning model for demand-based dynamic pricing
- Built a blockchain-backed billing system (SHA-256) for tamper-proof transaction records
- Optimized edge inference, cutting latency 73% (45ms → 12ms)

Visitor Management System

Jul 2025 – Aug 2025

MERN · Docker

- Built guest registration and tracking with QR-code-based entry passes
- Designed a real-time dashboard for scheduled and active visitor monitoring
- Integrated badge printing and WhatsApp notifications into the check-in flow

VoltTrack — Electricity Billing System

Jan 2025 – Apr 2025

Python · Flask · MySQL

- Built a Flask–MySQL backend with full CRUD for customer and billing data
- Integrated payment processing and automated PDF receipts via ReportLab
- Added search and reporting tools for billing management

Portfolio Website — krishgohel.dev

2025, redesigned 2026

Next.js · TypeScript · Tailwind CSS · Framer Motion

- Designed and built a personal site spanning software, data, design, and music
- Built a custom data-visualization gallery and an interactive typographic hero
- Implemented an independent color-palette / design-mode theme engine

SKILLS

Languages	Python, Java, C/C++, HTML, CSS
Frameworks & Stacks	MERN, Flask, Next.js
Data & ML	Tableau, Jupyter Notebook, Federated Learning, Reinforcement Learning
Tools	Docker, Git, Figma
Also Familiar	EasyEDA, AutoCAD, Cisco Packet Tracer

VOLUNTEERING

Rotary Club, Jamshedpur

Jun – Jul 2025

Volunteer, Community Development

- Supported healthcare infrastructure work, including an operation theater build-out
- Helped install public water access points outside local courts

Lions Club, Jamshedpur

May – Jun 2025

Volunteer, Community Outreach

- Assisted educational activities for autistic and underprivileged children in an inclusive learning environment

LANGUAGES

English, Hindi, Gujarati — Native
German — Elementary
